

# SACC-1

Semi Automatic Single Head Chuck Capping Machine

## **Key Features:**

---

- Automatic Bottle Indexing Unit
- 30 Bottles Per Minute Maximum
- Intelligent Electronic Torque Control
- Heavy Duty Stainless Steel Frame
- 110v 1 Phase Power
- Easy to Use Controls

## **Options:**

---

- Conveyor
- Additional Chucks and Caps

## Semi Automatic Single Head Chuck Capping Machine

The Semi-Auto Chuck Capper is designed for the cost conscious consumer, or when specific torque accuracies are needed. The operator of the machine manually places the caps on the bottles as they pass and the Semi-Auto Chuck Capper automatically tightens them. The Semi-Auto Chuck Capper uses the same chucks and inserts as are other cappers to accurately tighten caps. An electronic clutch determines how much torque is applied to each cap.

Our Semi-Auto Chuck Capper's are designed to handle most bottle types including P.E.T, P.V.C, plastic, and glass. To eliminate damage to caps and reduce insert wear, the Semi-Auto Chuck Capper comes with adjustable electronic torque values.

A Conveyor and an operator are required. the operator is required to place caps on the bottles as they pass by on the conveyor. Once the caps are placed the Accucapper can then secure them onto the bottles.

The Semi-Auto Chuck Capper comes complete with: an A.B.I. unit, a universal stand to mount onto your conveyor one chuck, and one insert (up to a size 50)

Accutek has a wide variety of chuck and inserts available to accommodate many closure types and sizes.

Chuck Size	Closure Size Range
10	Up to 15 mm
20	10mm - 25mm
25	15mm - 30mm
30	20mm - 35mm
40	25mm - 40mm
50	30mm - 50mm
60	40mm - 60mm
70	50mm - 70mm
75	60mm - 80mm
80	80mm - 90mm
90	90mm - 100mm
100	100mm - 110mm
110	110mm - 120mm
25d	15mm - 30mm Deep Well
30d	20mm - 35mm Deep Well

### Dimensions:

Length: 60" (1524 mm)

Depth: 36" (914.4 mm)

Height: 24" (609.6 mm)

### Weight:

Approx. ~150 lbs. (68.03 kg)

### Capping Speed:

Up to 30 CPM\*

### Cap Size:

Min: 10mm / Max: 120mm

### Torque Range:

1 - 90 In-Lb

### Electrical:

110 VAC (optional: 220 VAC)

### Air Requirements:

120 PSI @ 2 CFM

\* Capping speed is dependant on several things: operator, cap size, and container characteristics
